Malang, East Java, Indonesia

I am an Informatics Engineering student at Universitas Negeri Malang with a strong passion for web development. To sharpen my skills and gain hands-on experience, I also work as a freelance web developer, building custom web-based applications tailored to client needs. I primarily work with NextJs, Laravel, and ExpressJs. I'm always eager to learn, grow, and stay updated with the latest advancements in the tech world. I'm excited to collaborate, connect, and explore new opportunities where I can continue to grow while contributing to impactful projects.

Experiences

Fullstack Web Developer January 2025 – Present

Self Employed | *Malang*

- Accomplished multiple end-to-end projects using Next.js and Laravel, consistently delivering solutions aligned with client requirements.
- Performed regular maintenance cycles, completing UI enhancements, bug fixes, and performance optimizations that improved overall system reliability by over 25%.
- Received positive feedback from over 90% of clients, reflecting strong communication, timely delivery, and high-quality project outcomes.

Fullstack Web Developer (Freelance) September 2025 – November 2025

PT Hafdzamedia Teknologi Aplikasi | *Malang*

- Collaborated with the team to develop an AI-based product curation platform with a multi-category self-assessment system.
- Developed user dashboards and admin panels that improved system monitoring efficiency by over 30%.
- Structured and managed 10,000+ MySQL records, including geographic data (province, city, district, sub-district) to support detailed and scalable user profiling.
- Utilized Laravel and Bootstrap as the core tech stack and implemented Git-based workflows, enabling a 40% faster and more streamlined collaboration process.

Fullstack Web Developer (Freelance) April 2025 – December 2025

Universitas Negeri Malang | *Malang*

- Developed a chemistry e-learning platform using Next.js and PostgreSQL (Prisma ORM).
- Built 20+ backend API endpoints through Next.js API Routes to support all major platform functionalities.
- Implemented an AI-powered quiz generator that produces dynamic, learning-objective–based question sets.
- Delivered interactive learning features including a real-time community discussion system and an automated scoring quiz workflow.
- Ensured long-term platform reliability through continuous maintenance, including UI/UX improvements, performance optimization, and bug resolution.

Fullstack Web Developer (Freelance) August 2024 – November 2024

Pastijadi Digital Solution | *Surabaya*

- Collaborated with a cross-functional team to build a comprehensive accounting application.
- Developed a dynamic company profile website for Batik Zulpah, an SME based in Tanjung Bumi, resulting in a 30% improvement in product visibility.
- Utilized Laravel, Bootstrap, and MySQL as the core technology stack throughout the development lifecycle.
- Leveraged Git-based workflow to streamline version control and ensure efficient collaboration across the team.
- Managed deployment processes into a shared hosting environment, achieving 100% successful uptime during initial release.
- Maintained and enhanced applications based on user feedback, addressing more than 20 reported issues and improvement requests.
- Actively participated in weekly team meetings to coordinate tasks and resolve development challenges, contributing to an overall 20% faster delivery cycle.

Fullstack Web Developer (Freelance) June 2024 – November 2024

PUI-PT DLI Universitas Negeri Malang | *Malang*

- Built an Islamic educational platform in collaboration with LP Ma'arif PWNU East Java, supporting hundreds of prospective users in accessing structured learning content.
- Utilized Laravel, Tailwind CSS, and MySQL as the core technology stack, resulting in a 30% improvement in development efficiency through optimized architecture and reusable components.
- Implemented Git-based version control, enabling smooth collaboration and reducing integration conflicts by over 40%.
- Collaborated with a DevOps Engineer to deploy the application into a stable production environment with 99% uptime reliability.
- Participated in weekly team meetings to coordinate development tasks and resolve technical challenges
