Malang, East Java, Indonesia

An undergraduate student at Universitas Negeri Malang with experience building web applications using technologies such as Next.js and Laravel. Experienced in delivering end-to-end solutions as a freelance developer, covering requirements analysis, system design, implementation, and deployment across diverse business domains especially in serverless and shared hosting environtments. Familiar with managing relational databases such as MySQL and PostgreSQL to ensure reliable data processing and system consistency, while also handling client-server integration and asynchronous data flows.

Experiences

Fullstack Web Developer (Freelance) April 2025 – August 2025

Joki Proyek | *Indonesia*

- Developed multiple web-based systems including an internship career platform, a healthcare consultation application, and business landing pages by implementing end-to-end application logic across client and server layers.
- Designed and implemented application features covering user management, consultation workflows, and content delivery with structured data modeling and request handling.
- Built and integrated 15+ application endpoints and client-side data flows to ensure consistent communication between interfaces and backend services with proper validation and error handling.
- Managed codebase and version control workflows to maintain structured development, clear change tracking, and controlled release cycles across implementations.
- Coordinated directly with clients to define implementation scope, align technical expectations, and manage delivery timelines across multiple project phases.

Fullstack Web Developer (Freelance) August 2024 – November 2024

Pastijadi Digital Solutions | *Indonesia*

- Developed and maintained an end-to-end web platform for a batik business, building both customer-facing pages and a secure internal admin portal within one integrated application architecture.
- Implemented structured content operations for products, categories, articles, educational content, and media references, with robust data modeling, relational consistency, and backend validation workflows.
- Contributed to the development of Accounts Payable and Accounts Receivable modules in an internal accounting system to track vendor liabilities and customer receivables with user-based data isolation.
- Owned production deployment on a shared-hosting setup, including environment provisioning, database and storage readiness, asset build delivery, and post-release verification to keep the application stable in live operations.

Fullstack Web Developer (Intern) June 2024 – November 2024

PUI PT DLI Universitas Negeri Malang | *Indonesia*

- Developed an Islamic educational platform by implementing features such as dzikir materials, shalawat, user communities, and spiritual monitoring systems across core user workflows.
- Implemented 20+ request handlers and application logic to support authentication, content management, and user interactions throughout the platform.
- Built secure access mechanisms using token-based authentication and role-based access control (RBAC) to manage permissions across application routes and administrative interfaces.
- Delivered server-rendered user interfaces integrated with application logic to support responsive and consistent user experiences.

Backend Developer (Freelance) December 2023 – June 2024

Exoria Serana Digital | *Indonesia*

- Designed and built 10+ endpoints for Exoria Serana Digital platform using controller-based routing with resourceful patterns, covering full CRUD operations and consistent request handling with centralized error responses.
- Implemented authentication and authorization using token-based sessions with role-aware access control, integrating middleware and guard layers to secure protected routes.
- Managed data operations through structured ORM models with centralized service handling, including secure credential management and media file storage integration.
- Developed validation pipelines using request-based validation classes to enforce input constraints, and maintain data integrity across user and product workflows.

Educations

Universitas Negeri Malang 2022 - 2026
S1 Teknik Informatika
GPA 3.76/4

SMA Negeri 3 Malang 2019 - 2022
Matematika dan Ilmu Pengetahuan Alam
GPA 89/100

Core Skills

Programming Languages **:** JavaScript, TypeScript, PHP, Python, Go
Libraries / Frameworks **:** React.js, Next.js, Laravel, ExpressJs, TailwindCSS
Tools **:** VS Code, Git, Postman, Docker, Jira

Languages

Bahasa Indonesia (native), English (not yet fluent)
