Malang, East Java, Indonesia

An undergraduate student at Universitas Negeri Malang with experience building web software applications across client and server layers. As a freelance developer, experienced in delivering end-to-end solutions ranging from requirements analysis and system design to implementation and deployment across various business domains, particularly in serverless and shared hosting environments. Passionate about modern web development as a Next.js, Laravel, and Vue.js enthusiast with a strong interest in building scalable applications and maintainable software architectures. Familiar with relational database management using MySQL and PostgreSQL to support reliable data processing and system consistency while also handling client-server integration, asynchronous data flows, and responsive user interactions. Continuously interested in improving efficient development workflows and creating intuitive digital experiences through modern web technologies.

Experiences

Software Engineer (Part-Time) November 2025 – Present

PT Intervyou Labs Indonesia | *Jakarta, Indonesia*

- Collaborated with a cross-functional engineering team to develop and maintain an AI-powered SaaS career preparation platform using Next.js, Prisma ORM, PostgreSQL, and MySQL across frontend and backend systems.
- Built 20+ scalable features and API endpoints including AI workflows, analytics dashboards, job recommendation systems, and payment discount integrations using reusable service layers and structured validation.
- Refactored 15+ legacy code modules by applying clean architecture principles, reusable components, and maintainable backend service structures to improve scalability and code maintainability.
- Debugged and resolved production issues across staging and live environments while working with technical and non-technical teams to improve application reliability and performance.

Fullstack Developer (Contract) April 2025 – March 2026

Independent / Freelancer | *Indonesia*

- Developed an end-to-end chemistry e-learning platform for educational research using Next.js, PostgreSQL, and Prisma ORM across frontend and backend systems.
- Designed and implemented 15+ API endpoints with structured request handling and scalable database persistence.
- Optimized PostgreSQL performance through efficient Prisma ORM queries, relational data management, and database indexing strategies.
- Built responsive and reusable UI components using shadcn/ui and Tailwind CSS to improve cross-platform user experience.
- Improved client-server data flow using TanStack Query for efficient state management and caching.
- Reduced serverless cold start latency by implementing a global singleton pattern for persistent database connection reuse.

Fullstack Developer (Freelance) August 2024 – December 2024

Pastijadi Digital Solutions | *Malang, Indonesia*

- Developed the Batik Zulpah business platform using Laravel and MySQL, integrating a customer product catalog and custom CMS for batik product management.
- Designed and managed a relational MySQL database with 10+ normalized tables using Eloquent ORM, structured validation, and maintainable data workflows.
- Implemented secure authentication and Role-Based Access Control (RBAC) in Laravel with separate Admin and Customer authorization layers to protect user and business data.
- Built responsive server-rendered interfaces using Blade Template, Bootstrap, and Alpine.js to ensure smooth cross-device user experience.
- Managed application deployment and production configuration in a cPanel shared hosting environment, including database migration, environment setup, and maintenance.

Fullstack Web Developer (Internship) June 2024 – November 2024

PUI-PT DLI Universitas Negeri Malang | *Malang, Indonesia*

- Developed core workflows for an Islamic educational platform using Laravel and Tailwind CSS to support scalable content delivery and user interactions across multiple modules.
- Implemented 20+ request handlers and backend business logic for authentication, content management, and user-driven operations with structured server-side processing.
- Applied token-based authentication and Role-Based Access Control (RBAC) to secure protected routes and administrative features.
- Built responsive server-rendered interfaces using Laravel Blade Template and Tailwind CSS to support consistent user interactions and reliable data flow across the platform.
- Structured application logic using validation workflows, relational data handling, and MySQL-backed persistence to improve maintainability and scalability.

Notable Projects

Eduvoka - Adaptive E-Learning Platform
An AI-powered adaptive e-learning platform built with Next.js, Tailwind CSS, Prisma ORM, PostgreSQL, and the Gemini API to deliver personalized learning experiences through real-time analytics, burnout detection, and a Socratic AI tutor.

Fulusin - Financial Tracking Platform
A web-based financial tracking platform built with Next.js, Tailwind CSS, Prisma ORM, and PostgreSQL that helps 50+ users manage, monitor, and analyze financial activities within specific timeframes.

Equichem - Platform Pembelajaran Kesetimbangan
A chemistry e-learning platform for educational research with rich features like learning material management, interactive quizzes, real-time discussion, and AI-powered question generation focus on highschool students specially in SMAN 4 Malang (with 100+ users usage) using Next.js, PostgreSQL, and Prisma ORM across frontend and backend systems.

Pastijadi Accounting App
A web-based accounting management application built with Laravel, Bootstrap, Alpine.js, and MySQL to streamline financial operations and support multiple accounting workflows within the company.

Educations

Universitas Negeri Malang 2022 - 2026
S1 Teknik Informatika
GPA 3.76/4

SMA Negeri 3 Malang 2019 - 2022
Matematika dan Ilmu Pengetahuan Alam
GPA 89/100

Core Skills

Programming Languages	**:** JavaScript, TypeScript, PHP, Python, Go
Libraries / Frameworks	**:** React.js, Next.js, Laravel, ExpressJs, Vue.js, TailwindCSS, Gin
Tools	**:** VS Code, Git, Postman, Docker, Linux

Languages

Bahasa Indonesia (native), English (elementary proficiency)
